

# IntaChange Enterprise with Microsoft Project

Web-based Change Management

IntaChange Enterprise change management software is fully integrated with Microsoft Project.

Create your project definition in Microsoft Project, open IntaChange Enterprise, hit synchronise and all your project information is automatically carried forward into IntaChange Enterprise. No duplication of effort, no re-keying of data.

Conversely, create a new Request For Change in IntaChange Enterprise and it appears in Microsoft Project as a new task.

Changes such as costs, end dates etc. are automatically updated in both MS Project and IntaChange Enterprise, every time you synchronise.

■ See your information in IntaChange Enterprise and MSProject

■ No re-keying of data

■ Save time and effort

■ IntaChange Enterprise changes are automatically created as Project Tasks and GANTT chart items

■ Control change and project plans simultaneously

■ Customize IntaChange Enterprise to correspond exactly with your Projects

■ Information stored in IntaChange Enterprise automatically appears in Microsoft Project and vice versa.

## IntaChange your Projects

- Plan
- Create
- Control
- Integrate
- Synchronise
- Up-date

IntaChange Enterprise is developed and sold exclusively by:

Change and configuration management specialists

The screenshot shows the IntaChange Enterprise web interface. At the top, there's a navigation menu with options like Home, Main, Attachments, Comments, History, Monitors, References, Tasks, Votes, Reports, Preferences, Integrations, Admin, Email Admin, Help, and Log off. The main content area is titled 'My Open Changes' and displays a table of changes. A red arrow points from the 'RFC00003' entry in the table to the detailed view below. The detailed view shows fields for Change Type (Normal), Priority (High), Scheduled Completion Date (21/04/2008), and Percent Complete (4%).

Change	Class	Status	Originator	Owner	Locked	Summary
RFC00003	RFC	Working	admin	Ben Barter	<input type="checkbox"/>	Problem with user interface
RFC00024	RFC	Submitted	admin	John Richards	<input type="checkbox"/>	Update design feature

The screenshot shows the Microsoft Project Gantt Chart for 'Intasoft Developer Project.mpp'. A red arrow points from the 'RFC00003' task in the Gantt Chart to the detailed view in the IntaChange Enterprise interface. The Gantt Chart shows two tasks: RFC00003 (6 days, Mon 14/04/08 to Mon 21/04/08, Ben Barter) and RFC00004 (4 days, Thu 17/04/08 to Tue 22/04/08, John Richards).

Task Name	Duration	Start	Finish	Resource Names	ICMD
RFC00003	6 days	Mon 14/04/08	Mon 21/04/08	Ben Barter	
RFC00004	4 days?	Thu 17/04/08	Tue 22/04/08	John Richards
