

AllChange and Araxis Merge provide a powerful baseline and file comparison facility

AllChange's integration with Araxis Merge, the visual file/folder comparison/merging application, makes AllChange configuration management more powerful than ever.

Araxis Merge is available directly from Intasoft.

Buy Araxis Merge separately, or as an add-on to AllChange.

www.araxis.com/

- ◆ The essential baseline differencing facility for all software professionals
- ◆ Determine exactly what has changed between releases, by hierarchically comparing baselines
- ◆ Pinpoint the exact differences between versions
- ◆ Accurately compare baselines, just as you would folders
- ◆ Powerful facility for release management, variant management and reporting
- ◆ Drill down into sub-baselines and compare file content of part baselines
- ◆ Side-by-side version comparison of configuration items
- ◆ 3-way comparison and merging
- ◆ Difference folders and files and compare source hierarchies
- ◆ Work with text files, including ASCII, MBCS and Unicode
- ◆ Easily identify and review every change in every source file, even when comparing source hierarchies containing thousands of files.

Baseline comparison

File comparison using the Araxis Merge integration

*Improve your productivity.
 Saving 2 hours a week on comparisons, would free up over 100 developer hours a year.*
