

Easy to use and simple to customize

Key Benefits

- ◆ Comply with SOX and ITIL
- ◆ Control and automate change
- ◆ Improve productivity
- ◆ Reduce the cost of change
- ◆ Prioritize changes
- ◆ Automate processes
- ◆ Increase efficiency
- ◆ Prevent unauthorized change
- ◆ Control risk/impact analysis

...and much, much more

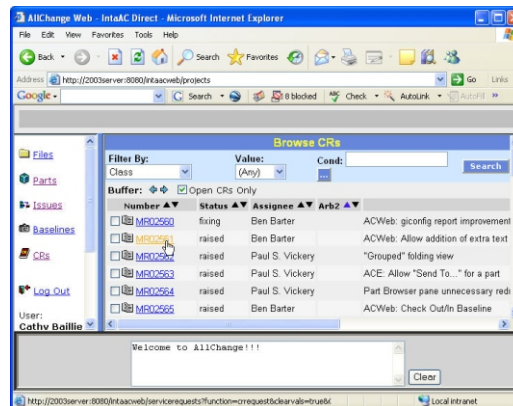

Insert the CD and click install. It's as simple as that. With our out-of-the-box solution you can be up and running in as little as one day.

AllChange has tight integrations with many 3rd party applications and development environments, which means that training and disruption to normal working practices are minimized.

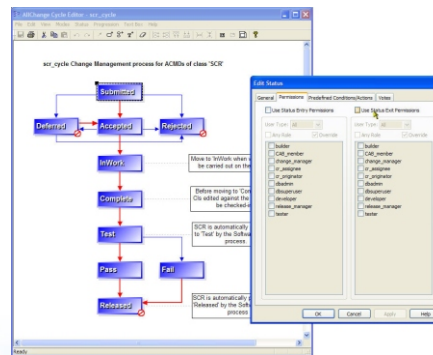

Upgrade tools are supplied to help you keep up-to-date with the latest features and facilities.

Simple to Customize

- ◆ Customize fields, states, error messages, menus, toolbars, functions and commands
- ◆ Customize to fit your business processes for each type of item, change and release
- ◆ Site definable entry conditions and action triggers for individual command
- ◆ Create your own site specific reports
- ◆ Customize web-based reports
- ◆ Create your own queries
- ◆ Customize status and priority levels
- ◆ Unique, customizable browsers
- ◆ Graphical tools make customization a "point and click" activity
- ◆ Further customization facilities provided for even the most complex requirement

AllChange is available for Windows or with the user friendly web interface, shown above.

Design your own lifecycles and specify user permissions.

Customize your own site specific reports.

Professional configuration management

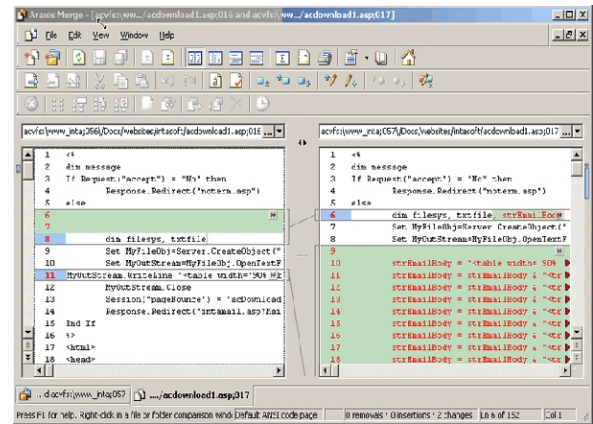

Configuration management that gives you full version control

Version control and concurrent development

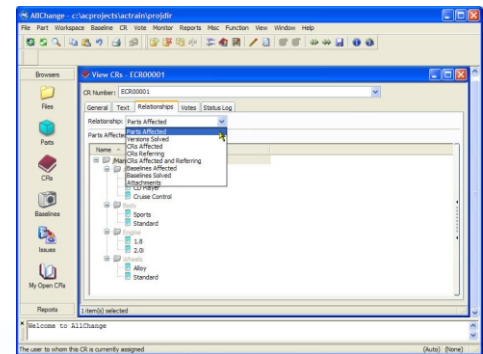

- ◆ Full version control and concurrent development facilities
- ◆ Ensure old versions are not lost
- ◆ Ensure people don't overwrite each others changes
- ◆ Examine the differences between versions
- ◆ Automatically update work areas when a new version is created
- ◆ Get the essential information of 'who', 'what', 'when' and 'why'
- ◆ Concurrent development support with branching using meaningful names
- ◆ Branched versions support parallel developments/bug fixes/variants
- ◆ Update releases automatically on checking in new versions
- ◆ Automated merge tool reduces errors in merge process

File attachment support for changes, releases and emails

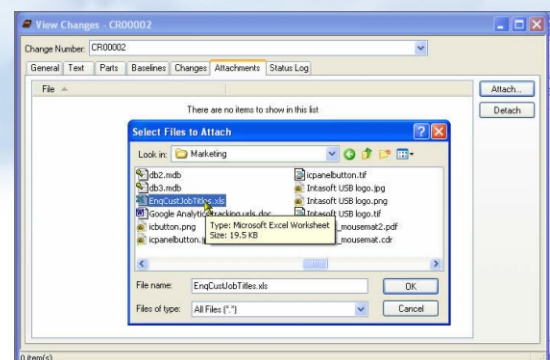

- ◆ Keep relevant information in a single place
- ◆ Preserve the context of your information
- ◆ Add and remove ad hoc notes, thoughts and discussion points without compromising processes or procedures

Compare versions and see exactly what has changed.

Record and view every version of every part associated with a change.

Attach project plans, screen dumps, test plans, design drawings, documents and other files.

View the contents of file attachments.
